CUSTOM ΑΓΩΓΟΣ
WITH REGULAR GRILLE

**PERFORATED ACCESS
WITH PUSH BUTTON**

This image shows a tall, narrow, light-colored perforated access panel standing upright on a wooden subfloor. The panel features a series of vertical slats. A small, rectangular push button is visible at the bottom edge of the panel. The background shows a construction site with a window and some equipment.

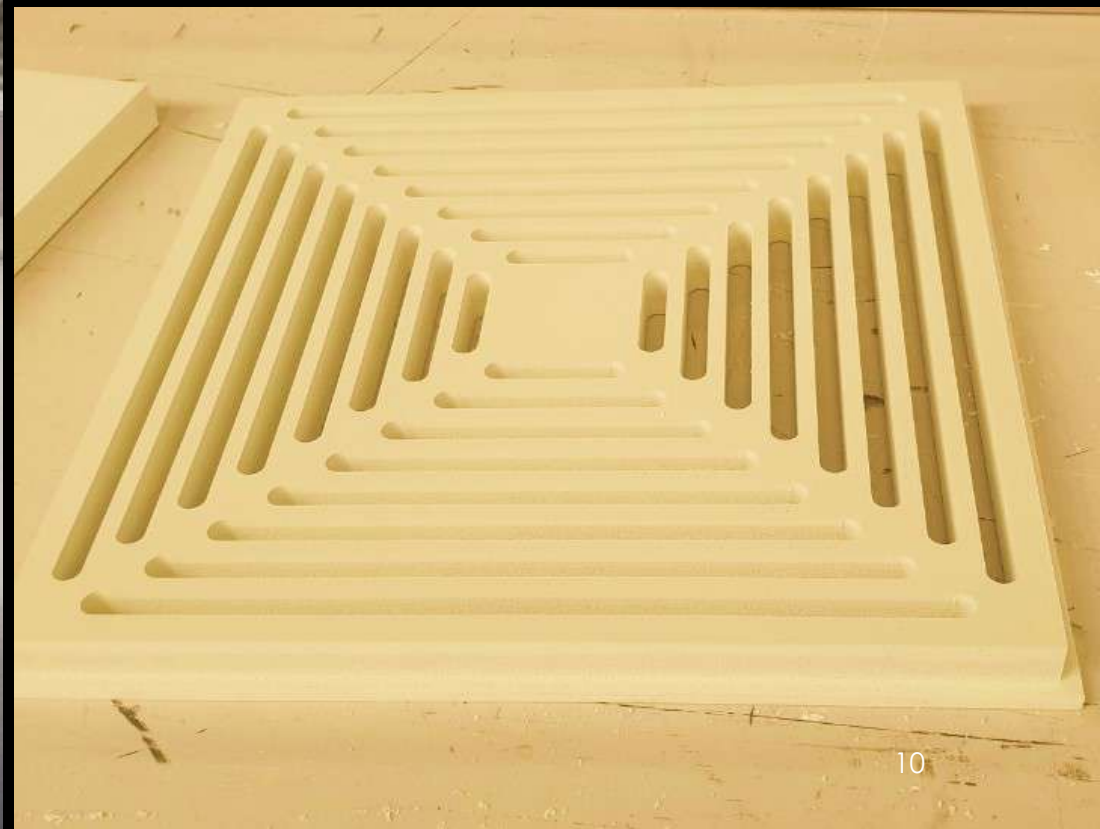

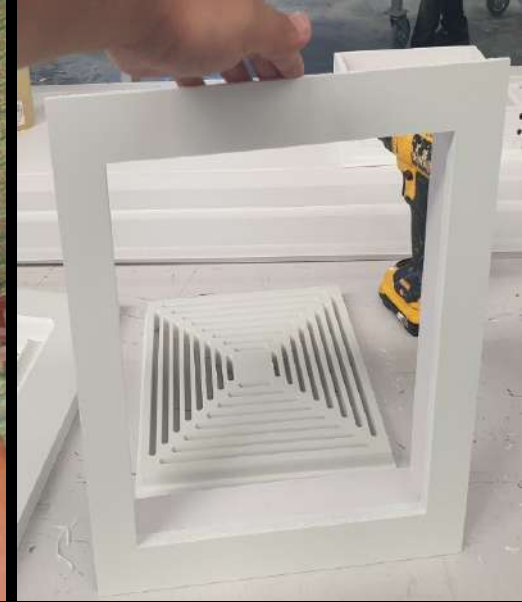

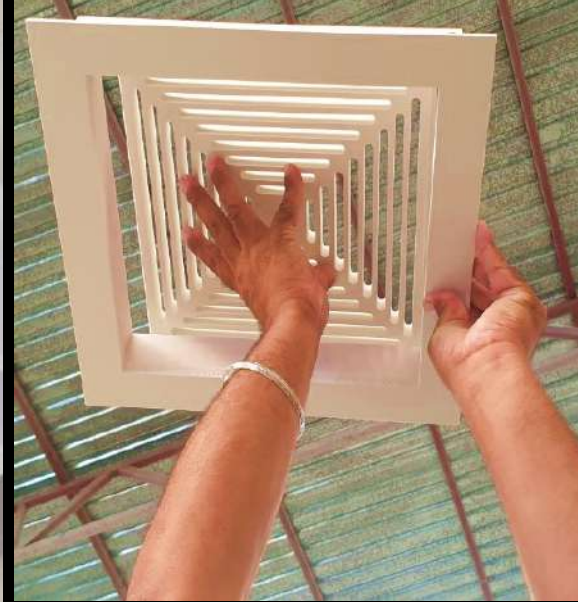

**REGULAR GRILLE
ΣΕ PLENUM BOX**

This image shows a rectangular, light-colored regular grille with a series of parallel slats, mounted on a white surface. The grille is set within a black frame, which is part of a plenum box. The background is a light-colored wall.

EXPORTS
PALLET PACKAGING PROCESS

- Each order for us is unique and is defined based on the product.
- Each product has its own packaging of specific custom-made dimensions, and the boxes are made of OSB wood that is placed on a wooden pallets that we manufacture according to each order.
- A sponge and special PVC strips are used inside the package to stabilize the product where needed.
- The philosophy of the packaging to the customer is when the product is being received, to be ready for use without do anything regarding the composition of the pieces, with a guide plan from our design department and with numbered panels from our production factory.
- Both during loading and shipment as well as during unloading, the pallets are and should be placed on a straight surface, opened carefully and not exposed to external factors.
- We have paid special attention to the packaging of our products, for their safest transport from the port to our partner.
